

ATF

Automatic Transmission, one of Aisin's main products, has been widely used by more than 40 carmakers around the world. One out of every five A/T vehicles uses Aisin's Automatic Transmission. Aisin is the world largest A/T supplier. Amongst the makers who have capability to design and manufacture A/T as well as high quality ATF, AISIN is one of the best choice. Ever since the development of A/T, the electronic and hydraulic components have become more complicated. Therefore it is very important to service A/T regularly.

AISIN recommends car owners to change ATF every 2 years or 20000km. Without proper maintenance for the ATF, your car performance will be worsened, more fuel will be consumed and the transmission may be damaged.

AISIN supplying Automatic Transmission to the following client

- Japan
 - TOYOTA
 - Mitsubishi
 - Isuzu
 - Mazda
 - Suzuki
 - Daihatsu
- Europe
 - Volvo
 - Opel
 - Vauxhall
 - Volkswagen
 - Porsche
 - Audi
 - Peugeot Citroen
 - Ford
 - Skoda
 - BMW
 - Jaguar
- USA
 - Chrysler
 - GM

Features

- Smooth starts under the coldest conditions: Eliminates start delays at low temperatures with superior low temperature flow characteristics.
- Improved shift feel: Optimum friction properties deliver seamless gear changes without harsh shift shock.
- Responsive starts and increased performance: Optimum friction properties reduce power loss, improve responses, and ensure reliability.

Advantages of regular ATF maintenance:
